

Hospital Outpatient and Physician Coding and Billing Guide 2020

Common Diagnosis Codes

ICD-10 ¹	Description
K21.0	Gastro-esophageal reflux disease with esophagitis
K21.9	Gastro-esophageal reflux disease without esophagitis

Professional - Physician

CPT* Code ^{4,5}	Description	2020 National Medicare Average ⁵
43284	Laparoscopy, surgical, esophageal sphincter augmentation procedure, of sphincter augmentation device (i.e. magnetic band), including cruroplasty when performed	\$684
43285	Removal of esophageal sphincter augmentation device	\$704

Hospital Outpatient

CPT*/HCPCS Codes ^{3,4}	Description	APC Status Indicator ^{5*}	2020 National Medicare Average ⁴
43284	Laparoscopy, surgical, esophageal sphincter augmentation procedure, placement of sphincter augmentation device (i.e. magnetic band) including cruroplasty when performed	5362 J1	\$8,413
L8699	Prosthetic implant, not otherwise specified <i>(Commercial payers only - confirm payer guidelines for reporting device separately)</i>		Payer Priced
A4649	Surgical supply, miscellaneous		Payer Priced
43285	Removal of esophageal sphincter augmentation device	5361 N / Q2	\$4,834

*J1 = Comprehensive APC; all services on the claim are packaged into one payment.

*Q2 = Payment is packaged if billed on the same date as a procedure with a T status indicator; otherwise paid separately.

N = minor procedures are defined as procedures that have status indicator F, G, H, K, L, N, R or U

LINX® Reflux Management System Important Safety Information

The LINX Reflux Management System is a laparoscopic, fundic-sparing anti-reflux procedure indicated for patients diagnosed with Gastroesophageal Reflux Disease (GERD) as defined by abnormal pH testing, and who are seeking an alternative to continuous acid suppression therapy (i.e. proton pump inhibitors or equivalent) in the management of their GERD. Rx Only. Contraindications: Do not implant the LINX system in patients with suspected or known allergies to titanium, stainless steel, nickel, or ferrous materials. Warnings: The LINX device is considered MR Conditional in a magnetic resonance imaging (MRI) system up to either 0.7 Tesla (0.7T) or 1.5 Tesla (1.5T), depending on the LINX model implanted. Laparoscopic placement of the LINX device is major surgery. General Precautions: The LINX device is a long-term implant for use in patients 21 years or older. Medical management of adverse reactions may include explantation and/or replacement. Potential Risks Associated with LINX System: belching, decreased appetite, device erosion, device migration (device does not appear to be at the implant site), dysphagia (difficult swallowing), flatulence, hiccups, inability to belch or vomit, infection, nausea, odynophagia (painful swallowing), pain regurgitation, stomach bloating, weight loss, and worsening of preoperative symptoms. Your physician can help you determine if LINX is right for you. Patient results may vary. For full patient information visit www.linxforlife.com or www.ethicon.com.

Hospital Inpatient Coding and Billing Guide 2020

Common Diagnosis Codes

ICD-10 ¹	Description
K21.0	Gastro-esophageal reflux disease with esophagitis
K21.9	Gastro-esophageal reflux disease without esophagitis

Hospital Inpatient

ICD-10 ²	Description
ODV44CZ	Restriction of Esophagogastric Junction with Extraluminal Device, Percutaneous Endoscopic Approach

MS-DRG	Description
326	Stomach, esophageal and duodenal procedures with MCC
327	Stomach, esophageal and duodenal procedures with CC
328	Stomach, esophageal and duodenal procedures without CC/MCC

Revenue Codes	Description
278	Medical/surgical supplies, other implants
360	OR Services
361	OR Services, Minor Surgery
