Comprehensive Solutions for the Craniofacial Surgeon

Family of Solutions for Orthognathic Surgery

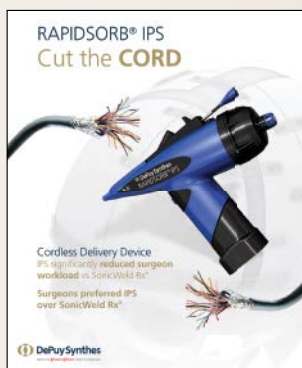

- MatrixORTHOGNATHIC™ Plating System provides a simple and efficient fixation system, with one-screw diameter for all applications
- TRUMATCH® CMF Orthognathic Splints are patient-specific solutions used to transfer the virtual plan to the OR
- Fully-customizable TRUMATCH Titanium 3D-Printed Guides and Plates help achieve accuracy, efficiency, and patient benefit, for even the most complex surgeries

RAPIDSORB® Injectable Polymer System

Cordless Resorbable Fixation for Cranial Vault Reconstruction

- Multiple fastener length options allow an optional bolus of polymer on the bone's underside
- Significantly decreases surgeon workload vs SonicWeld Rx¹
- Surgeons preferred IPS over SonicWeld Rx¹

Related Products

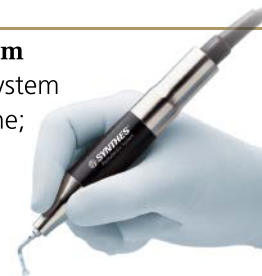

ViviGen® and ViviGen Formable® Cellular Bone Matrix
Osteogenic, osteoconductive, and osteoinductive allograft bone void filler

Tissue And Palatal Retractor Set
A dedicated instrument set for cleft lip and palate repair with unique retractors

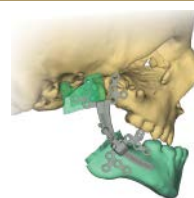

Piezoelectric System
Ultrasonic surgical system cuts mineralized bone; soft tissue sparing

Family of Distractors

- Curvilinear Distraction System allows surgeons to correct complex mandible deformities with an internal distractor and is compatible with TRUMATCH® CMF planning and guides
- External Midface Distractor provides user-friendly, versatile, and secure distraction of the midface and cranium
