Use SURGIFLO® with or without thrombin. Please refer to your thrombin IFU for preparation instructions.

**Flowgel Matrin Matrix Preparation**

1. Prepare the sterile solution (i.e. thrombin or sterile saline)

2. Measure the sterile solution and transfer into the sterile liquid transfer cup.

3. Draw up all the sterile solution from the sterile liquid transfer cup into the empty syringe.

4. Connect the syringes
   - Remove the blue cap from the SURGIFLO® Hemostatic Matrix. If needed, one end of the applicator may be cut off to access hard to reach tight spaces.
   - Attach this syringe to the SURGIFLO® Hemostatic Matrix Kit with thrombin use 2 mL of sterile solution.

5. Mix the contents of the two syringes
   - Begin mixing by transferring the sterile solution into the sterile pre-filled syringe containing the Gelatin Matrix.
   - Push the combined material between syringes 6 times (3 times back and forth) ending in the syringe with the blue plunger.

6. Attach the applicator tip
   - The product is now ready for clinical use.

---

**WARNING**

- Do not inject SURGIFLO® Hemostatic Matrix into blood vessels. See the Contraindications, Warnings, and Precautions.
- For complete product details, see instructions for use. For technical support, call 1-877-ETHICON.

---

**FROM THE HEMOSTASIS OPTIMIZATION PROGRAM**

**Problems**

- Bleeding that occurs in tight and irregular spaces and you cannot see the exact source of the bleed. You are concerned accessing a tight space will cause more harm.

**Solution**

**Difficult to Access**

- Bleeding that occurs in tight and irregular spaces and you cannot see the exact source of the bleed. You are concerned accessing a tight space will cause more harm.

---

**PRECAUTIONS**

- Do not inject SURGIFLO® Hemostatic Matrix into blood vessels. See the Contraindications, Warnings, and Precautions.
