

FIBULINK[®]

Syndesmosis Repair System

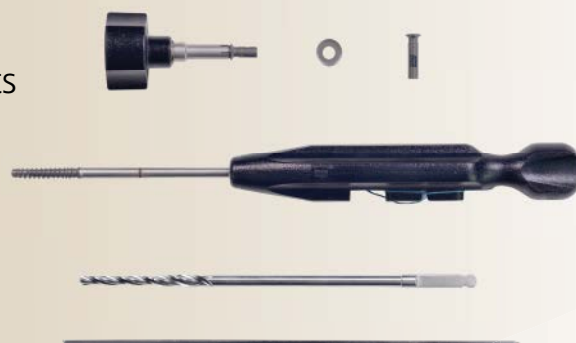

The best of both worlds:
Fixation of a screw ■ Flexibility of a suture

- The only complete syndesmotic repair system that has the ability to **fine tune and readjust compression** intraoperatively¹
- **Eliminates additional medial soft tissue disruption and helps improve procedural efficiency*** by delivering fixation through a single lateral incision
- **Higher strength and less postoperative elongation** than Arthrex Tightrope with a short, high-strength suture bridge^{2†}

- Available in titanium and stainless steel
- Provided in sterile kits with all required implants and instrumentation
- Compatible with the DePuy Synthes distal fibula plating line³

*Compared to suture button constructs.

†Based on bench testing which may not be indicative of clinical performance.
