Needle Holders

Experience the difference

Manufactured in Germany to the most exacting tolerances of the finest quality stainless steel, both holders offer an ergonomically palmable in-line handle and balance for comfortable fit and use. Tensioning allows use with a variety of needle wire diameters to prevent premature locking on the instrument jaws, while an etched shaft communicates the proper orientation of the instrument.

ENDOPATH® Needle Holders features

- 30cm and 45cm shaft lengths available
- Reusable device with instrument cleaning port
- Self-righting needle holder orients needles vertically, providing needle and suture manipulation in one instrument
- Palmable handle features an integrated ratchet
- Designed for precise control when using EEN and SH needle types, but may be used with other curved and compound needles
