MEGADYNE™ Telescoping Smoke Evacuation Pencil

Optimized Device Performance Guide

Before you begin

1. **Check electrode and remove tip protector:**
   Ensure the electrode is fully inserted. Remove the tip protector from electrode and discard.

2. **Attach to generator:**
   Insert the pencil plug into the receptacle on the MEGADYNE™ Electrosurgical Generator.

3. **Attach smoke tube to filter:**
   Securely connect the smoke evacuation tubing into the filter on the MEGADYNE™ Smoke Evacuator.

Electrosurgical Electrode

Tactile buttons

Tactile locking mechanism

Adjustable shaft

Double swivel tubing
Shaft extension

1. Adjust the shaft: Pull shaft away from the pencil shroud to extend to desired length.

2. Lock the locking mechanism: After reaching desired shaft length, turn the locking mechanism to the left to lock.

Clean the device

1. MEGADYNE™ Telescoping Smoke Evacuation Pencil is coated with PTFE to reduce eschar buildup and to aid in the easy removal of eschar with a damp gauze or sponge.

CAUTION: Do not clean instrument with abrasives. Do not use a scratch pad or other abrasive cleaner to remove eschar. This could damage the PTFE coating.
